

OUR ENERGY POLICY

Management's Energy Policy Statement

GfE is committed to the continuous improvement of its energy-related performance.

A large part of the production processes at GfE is highly energy-intensive. Next to the careful handling of resources and the protection of the environment, our endeavors to optimize energy use, reduce energy consumption and increase energy efficiency therefore always also improve our competitiveness.

GfE is committed to providing the resources required for achieving the company's energy objectives, and it guarantees the availability of all necessary information.

For the introduction, implementation, maintenance and improvement of our energy management as well as the continuous improvement of our energy-related performance, we have appointed a management representative and approved of the formation of an energy team. In order to meet the strategic and operational energy objectives together with this team, we will provide it with all the necessary human, technological and financial resources and information.

GfE is committed to compliance with all applicable legal requirements and other standards regarding energy use, consumption and efficiency met by the organization.

The compliance with legal obligations is a matter of course for us. Conformity is ensured through continuous verification of current legal requirements.

We support initiatives for the improvement of the energy-related performance.

We actively promote the acquisition of energy-efficient products and services as well as proposals for the improvement of the company's energy efficiency.
